## Alma Lasers Makes History – First Company Ranked for Five Consecutive Years in the Top Growth Rank of **Deloitte Technology Fast 50**.

Caesarea, Israel --- Alma Lasers is proud to announce that for the fifth consecutive year it has been positioned in the top 15 on the 2009 Deloitte Israel Technology Fast 50, the prestigious ranking of the 50 fastest growing technology companies in Israel.

While making this list is quite an accomplishment, appearing in the top 15 is a significant honor, especially when the achievement is sustained for five consecutive years.

For the fifth year in a row Alma lasers has displayed constant growth percentage: From its first ranking at Number 4 in 2005, through 2006 at Number 5 (while also making the Deloitte Technology Fast 500 EMEA that year), to Number 9 in 2007 and finally ranking in at Number 11 in 2008.

To determine the fastest growing companies, Deloitte reviewed fiscal year revenues over five years (2004-2008), calculated the revenue growth percentage over five years, and compared the results to the growth of other technology companies. Alma lasers rated first in the Biotech & Pharmaceutical & Medical Equipment category achieving 598% growth rate.

"Achieving sustained revenue growth of Alma Lasers for over five years is a tremendous accomplishment for a technology company operating in a competitive world", said Tal Chen, director in charge of the Deloitte Brightman Almagor Zohar Israel Technology Fast 50 Program. Alma Lasers deserves a lot of credit for its remarkable growth, and we commend them for it."

Yariv Matzliach, EVP of marketing and sales at Alma Lasers added "Being one of the top 50 fastest growing companies for five consecutive years shows that innovation through technology is the winning strategy for the aesthetic marketplace. We'll keep on this path in the future for the continued success of our customers".
