

LISTEN TO THE EXPERTS

PIXEL[®] CO₂
 & **PIXEL[®] CO₂**
OMNIFIT

The **Pixel[®] CO₂** from Alma Lasers is a fractional CO₂ laser system that combines the proven effectiveness of an ablative approach with high levels of patient comfort and convenience. Here's what a few of your distinguished colleagues had to say about their experiences with the Pixel CO₂ system and the Pixel CO₂ OMNIFIT[®] handpiece.

"I really like using the Pixel CO₂, especially after having analyzed the alternative CO₂ technologies that my colleagues use. When visiting physicians come into my office to observe me with Pixel CO₂, they're amazed at how quickly I can treat a full face and neck (10 to 15 minutes). The pain is minimal, the procedure is safe and my patient satisfaction is high."

Peter Rullan, MD

Board Certified Dermatologist, Chula Vista, CA

"Alma Lasers' Pixel CO₂ is the most powerful and versatile laser I use in my cosmetic dermatology practice. I can quickly and easily treat acne scars, extensive sun damage and wrinkling. Patients are extremely satisfied with the limited downtime and outstanding results. I own almost every system Alma offers and have been extremely impressed with their advanced technologies, competitive pricing and physician support."

Victoria Cirillo-Hyland, MD

Board Certified Dermatologist, Rosemont, PA

"I have used Alma's 70 Watt fractionated CO₂ laser for more than a year now. I am consistently impressed with my clinical results and have had uniformly high patient satisfaction rates. I am particularly impressed with the improvements this system makes in fine lines, textural irregularities, and dyschromias with relatively short downtime and minimal risk of untoward effects."

Jason Lupton, MD

Board Certified Dermatologist, San Diego, CA

"As a dermatologist, I see a wide variety of patients whose needs may be more medical than cosmetic. The Pixel CO₂ delivers safe, effective fractional treatments at a fraction of the usual cost. The Pixel CO₂ OMNIFIT costs approximately one-third as much as a new stand-alone platform, so I was able to give new life to my ablative CO₂ laser. I have many devices from Alma Lasers and I am extremely happy with their service and support."

Eduardo Weiss, MD

Board Certified Dermatologist, Hollywood, FL
